+00 000 652 966

PROFILE

QA Automation Engineer with 5 years of experience designing and maintaining automated test frameworks for web and API applications. Skilled in Selenium and Python, with hands-on experience integrating test suites into CI/CD pipelines to improve release quality and speed. Strong collaborator with cross-functional development teams in agile environments.

SKILLS

Selenium · Python · CI/CD · Pytest · Jenkins · API Testing · Git · Docker · Postman · SQL

WORK EXPERIENCE

QA Automation Engineer — Savanna Digital Solutions

Nairobi, Kenya | 2021-Present

- # Design and maintain Selenium-based automated test suites for web applications
- # Integrate automated tests into Jenkins CI/CD pipelines to support continuous delivery
- # Collaborate with developers to identify and troubleshoot defects early in the development cycle
- # Write and execute API test cases using Postman and Python requests library
- # Mentor junior QA staff on automation best practices

Technologies: Selenium, Python, Jenkins, Postman, Docker, Git

QA Engineer — Rift Valley Tech Systems

Nairobi, Kenya | 2019-2021

- # Executed manual and automated regression testing for e-commerce platform releases
- # Developed Python scripts using Pytest to automate repetitive test cases
- # Participated in sprint planning and reported defects using JIRA
- # Assisted in setting up initial CI/CD workflows for test automation

Technologies: Python, Pytest, Selenium, JIRA, MySQL

Junior QA Analyst — Nairobi Software Hub

Nairobi, Kenya | 2018-2019

- # Performed manual functional testing of internal business applications
- # Logged and tracked bugs using test management tools
- # Supported senior QA staff in creating test plans and test cases

Technologies: Excel, TestRail, SQL

EDUCATION

Bachelor of Science in Information Technology

University of Nairobi — 2018
