+00 000 261 161

PROFILE

Senior Data Engineer with 8 years of experience designing and maintaining scalable data pipelines and ETL processes for analytics and machine learning use cases. Skilled in building robust orchestration workflows with Airflow, optimizing SQL-based data warehouses, and leading migrations to cloud data platforms. Strong background in mentoring junior engineers and collaborating with cross-functional teams to deliver reliable data infrastructure.

SKILLS

Python · SQL · Airflow · Apache Spark · AWS · Docker · dbt · Kafka · PostgreSQL · Data Modeling · CI/CD · Terraform

WORK EXPERIENCE

Senior Data Engineer — NimbusTech Solutions

Buenos Aires, Argentina | 2021-Present

- # Design and maintain Airflow DAGs orchestrating ingestion pipelines from multiple sources
- # Lead migration of on-premise ETL jobs to AWS-based data lake architecture
- # Collaborate with data science teams to build feature pipelines for ML models
- # Optimize SQL queries and warehouse schemas to improve report performance
- # Mentor two junior data engineers on best practices and code reviews

Technologies: Python, Airflow, AWS, Spark, Redshift, dbt

Data Engineer — Southern Data Labs

Buenos Aires, Argentina | 2018-2021

- # Built and maintained batch ETL pipelines using Python and SQL
- # Implemented monitoring and alerting for data pipeline failures
- # Developed data models to support BI dashboards and reporting
- # Worked with Kafka to process near real-time event streams

Technologies: Python, SQL, Kafka, PostgreSQL, Airflow

Junior Data Engineer — Rio de la Plata Analytics

Buenos Aires, Argentina | 2016-2018

- # Assisted in developing ETL scripts for internal reporting systems
- # Wrote and optimized SQL queries for data extraction and transformation
- # Supported database maintenance tasks and data quality checks

Technologies: Python, SQL, MySQL, Bash

EDUCATION

Licenciatura en Ciencias de la Computación in Computer Science

Universidad de Buenos Aires — 2016
