+00 000 727 851

PROFILE

Senior Data Engineer with 8 years of experience designing and maintaining scalable data pipelines and warehousing solutions across fintech and e-commerce sectors. Skilled in building ETL/ELT workflows, optimizing SQL performance, and orchestrating batch and streaming pipelines with Airflow. Experienced mentoring junior engineers and collaborating with data science and analytics teams to deliver reliable, production-grade data infrastructure.

SKILLS

Python · SQL · Airflow · Apache Spark · AWS Redshift · Docker · dbt · Kafka · PostgreSQL · Terraform · Git · Data Modeling

WORK EXPERIENCE

Senior Data Engineer — Pampa Analytics

Buenos Aires, Argentina | 2021-Present

- # Design and maintain Airflow DAGs orchestrating ingestion of financial transaction data from multiple sources
- # Lead migration of legacy batch jobs to a modern ELT architecture using dbt and Redshift
- # Optimize SQL queries and warehouse schemas to reduce reporting latency
- # Mentor two junior data engineers and review pull requests for pipeline code
- # Collaborate with data science team to provision curated datasets for ML models

Technologies: Python, SQL, Airflow, dbt, AWS Redshift, Kafka

Data Engineer — Riogrande Comercio Digital

Buenos Aires, Argentina | 2018-2021

- # Built and maintained ETL pipelines processing e-commerce transactional and clickstream data
- # Developed Airflow DAGs to automate daily ingestion and transformation jobs
- # Wrote optimized SQL queries and stored procedures for reporting dashboards
- # Implemented data quality checks and monitoring alerts for pipeline failures
- # Containerized data processing jobs using Docker for consistent deployment

Technologies: Python, SQL, Airflow, Docker, PostgreSQL, Apache Spark

Junior Data Engineer / Backend Developer — Delta Software Solutions

Buenos Aires, Argentina | 2016-2018

- # Developed backend services in Python supporting internal reporting tools
- # Assisted in building initial data pipelines for extracting data from relational databases
- # Wrote SQL scripts for data extraction and transformation tasks
- # Supported production issues related to scheduled batch jobs

Technologies: Python, SQL, PostgreSQL, Git

EDUCATION

Licenciatura en Ciencias de la Computación in Computer Science

Universidad de Buenos Aires — 2016
