

Willem de Groot

Senior DevOps / Site Reliability Engineer

Amsterdam, Netherlands
c008.153@example.test
+00 000 274 829

PROFILE

Senior DevOps/SRE engineer with 8 years of experience designing and operating cloud infrastructure on AWS. Specialized in Kubernetes-based platforms, infrastructure as code with Terraform, and building reliable CI/CD pipelines. Focused on improving system observability, reducing operational toil, and mentoring junior engineers.

SKILLS

Kubernetes · Terraform · AWS · Docker · CI/CD · Prometheus · Grafana · Ansible · Python · Linux Administration · Helm · GitOps

WORK EXPERIENCE

Senior Site Reliability Engineer — Northgate Cloud Solutions

Amsterdam, Netherlands | 2021-Present

- # Lead migration of legacy services to Kubernetes clusters on AWS EKS
- # Design and maintain Terraform modules for multi-account infrastructure provisioning
- # Own on-call rotation and incident response processes for production systems
- # Mentor mid-level engineers on infrastructure best practices
- # Implement observability stack using Prometheus and Grafana for SLO tracking

Technologies: Kubernetes, Terraform, AWS, Helm, Prometheus, Grafana

DevOps Engineer — Delta Fjord Technologies

Rotterdam, Netherlands | 2018-2021

- # Built CI/CD pipelines using Jenkins and GitLab CI for microservices deployments
- # Automated infrastructure provisioning on AWS using Terraform and CloudFormation
- # Managed containerized workloads on Docker Swarm and later migrated to Kubernetes
- # Collaborated with development teams to improve deployment frequency and reliability
- # Maintained monitoring and alerting systems using Datadog

Technologies: AWS, Terraform, Docker, Kubernetes, Jenkins, Datadog

Junior Systems Administrator — Brightline Systems

Utrecht, Netherlands | 2016-2018

- # Administered Linux servers and internal network infrastructure
- # Assisted in setting up automated backup and monitoring solutions
- # Supported application deployments and troubleshooting for internal teams
- # Documented infrastructure configurations and operational procedures

Technologies: Linux, Bash, Nagios, Ansible

EDUCATION

Master of Science in Computer Science

Delft University of Technology — 2016
