

Wanjiru Kamau

QA / Test Automation Engineer

Nairobi, Kenya
c016.802@example.test
+00 000 352 501

PROFILE

Detail-oriented QA Automation Engineer with 5 years of experience designing and maintaining automated test suites for web and API applications. Skilled in building robust CI/CD-integrated test frameworks using Selenium and Python, with a strong focus on improving release quality and reducing manual testing overhead.

SKILLS

Selenium · Python · CI/CD · Pytest · Jenkins · API Testing · Git · Docker · Test Case Design · SQL · Postman

WORK EXPERIENCE

QA Automation Engineer — Savanna Digital Solutions

Nairobi, Kenya | 2022-Present

- # Design and maintain Selenium-based automated test suites for web applications
- # Integrate automated tests into Jenkins CI/CD pipelines
- # Collaborate with developers to identify and resolve defects early in the development cycle
- # Write and execute API test scripts using Python and Postman
- # Mentor junior QA testers on automation best practices

Technologies: Selenium, Python, Jenkins, Postman, Docker

Software QA Engineer — Kilimo Tech Africa

Nairobi, Kenya | 2020-2022

- # Developed automated regression test scripts using Selenium WebDriver and Python
- # Participated in sprint planning and defined test strategies for new features
- # Executed manual and automated testing for web and mobile applications
- # Reported and tracked defects using Jira

Technologies: Selenium, Python, Jira, MySQL

Junior QA Tester — Nairobi Software Hub

Nairobi, Kenya | 2019-2020

- # Performed manual functional and regression testing on web applications
- # Assisted senior QA engineers in creating automated test scripts
- # Documented test cases and maintained test data sets

Technologies: Selenium, Python, Excel

EDUCATION

Bachelor of Science in Computer Science

University of Nairobi — 2019
